- Email us at plmsupport@vertafore.com
- Login to the self-service portal at https://support.vertafore.com/vf_VertaforeLogin

WHAT'S NEW

The following are detailed descriptions of the specific enhancements in this UAT release:

Feature	Description
Daily PDB Updates: Optimizing Queuing of Daily Syncs	The Daily PDB Updates queuing process has been enhanced to so that only one sync of the Daily Updates type can be pending at a time. If there is a pending Daily Update for a producer when a new Daily Update alert is processed, then states from the new update are added to the existing pending update and an additional sync is not queued. This will improve daily PDB Updates throughput

Feature	Description
CE Deficiency not populating all expected producers	Resolved an issue with the caching of license codes that resulted in producers with incomplete CE requirements not being identified as CE deficient.
