WHAT'S NEW

The following are detailed descriptions of the specific enhancements in this Production release:

Feature	Description
Issue with Filtering of NULL Values for Business Unit in Interactive Reporting	Fixed an issue where External System Id and Business Unit filters in Interactive Reporting are not correctly filtering report results. Filters are now working as expected. [FLUX-2040]
Enhancement to Producer Authorization Web service to Identify the Rule that Failed in an Authorization Response	The Sircon Producer Manager Producer Authorization Web Service has been enhanced to include which rule failed as well as the reason for failure in the case of a failed sales authorization. [CHER-3720]
Issue with Agreement Changes in the OBDF	When a producer with agreement data is exported in the Outbound Data Feed, then the Agreement Changes section will correctly indicate if there were changes to that producer's agreement data in PM since the last Outbound Data Feed export. Additionally, Agreement Changes are now associated with the correct Agreement in the Outbound Data Feed. [TROT-3778]
